

Log: 2

Meeting No: 4

Date: 2025/11/17

Last Visit Date: 2025/11/2

Start Time: 8:00 AM

Finish Time: 8:30 AM

Items Discussed:

1. Research and analyze five similar software related to *HeartWay's* domain.
2. Identify and note their main features, user flow, and unique UI patterns, focusing on:
 - a. Navigation system and view layout
 - b. Color theory and visual consistency
 - c. Frameworks used (analyzed through Wappalyzer or similar tools)
3. Test and explore how each component functions to understand implementation strategies.

Achievements:

- Collected and reviewed five similar applications relevant to *HeartWay*.
- Observed and documented each app's UI flow, feature set, and color palette.
- Used Wappalyzer to identify frameworks and technologies behind each system.
- Gained practical insight into UI/UX standards and color palette selection for *HeartWay*.
- Create a color palette and store them in reports.

Problems (if any):

- Some websites blocked framework analysis through Wappalyzer.
- Difficulty deciding on which UI elements are most suitable for *HeartWay's* minimal interface.
- Time-consuming to compare color patterns across different themes.

Tasks for Next Meeting:

1. Identify and document the top 5 key pages from each researched software.
2. Analyse and summarize their detailed UI patterns:
 - a. Pagination style, Navigation flow, and View Layout
 - b. Button styles, Colour palette consistency, and Visual hierarchy
3. Prepare a comparative feature table across all five applications.
4. Begin drafting *HeartWay's* initial wireframes based on gathered insights.
5. Refine *HeartWay's* colour palette and button system for design consistency.
